## **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance.

The prior art does not teach all of the limitations of the claimed invention including covering only the magnetic layers and all areas from which the portions were removed with a layer of insulation whereby current through the device is constrained to flow that a central area of the device.

The applicant(s) remarks filed in the response of July 10, 2006 have been fully incorporated by reference herein. The feature of covering the magnetic layers with a layer of insulation was relied upon in Hayakawa (as shown in Fig. 1). However, the layer of insulation (e.g. 6) of Hayakawa covers the entire top surface of the bias cancellation layer (e.g. 16) and the magnetic layers (e.g. 4). This layer of insulation (e.g. 6) certainly does not *cover only the magnetic layers and all areas from which the portions were removed*. Therefore, it would <u>not</u> be obvious to modify Hasegawa in view of Hayakawa since neither one of them teach covering only the magnetic layers and all areas from which the portions were removed with a layer of insulation whereby current through the device is constrained to flow that a central area of the device.

Accordingly, Claims 1-6 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
